Related Items:**Additional Backup Information**

This contract provides for air release valves for the Austin Water Utility. Air release valves are installed in high elevations of the water distribution system. These valves expel air from the water system to prevent air pockets from forming and also allow air into the system to prevent damaged mains from collapsing. Valve sizes range from 1" to 18" the most common sizes are 2", 4", and 6". The valves are also installed in the reclaimed water system and in the collection system.

This contract was competitively awarded in 2008 for a 24-month base period in an amount of \$49,485.40 with three 12-month extension options. Amendment No. 1 exercised the first 12-month extension option for \$30,000. This recommended Council action is to approve Amendment No. 2 for \$30,000 for the second 12-month extension option and the authorization to enter into the final 12-month extension option for \$30,000, when appropriate, for a final contract value of \$139,485.40.
